

Giddyup!

When Dan Shirley mounts up, he's only horsing around with his Honda Goldwing tri-cycle, a three-wheeler done up with all you'd need to ride a real oat burner. The \$30,000 machine is equipped with a real western saddle (with pommel), a lariat and a hand-carved horse's head on the front fender to enhance the motif. Mr. Shirley, a retired 3M product development engineer, has been a Sun City resident for three years. "I always wanted a trike, but I sort of like horses, too," he says of his eye-catching motor-steed. Mr. Shirley rides with the Sun City Motorcycle Club.
